

connecting with putty

Download and install PuTTY

- Visit <https://www.putty.org/>
- Download putty.exe (or the installer) and run it.

Create an SSH connection

Field	Value
Host Name (or IP address)	Your VM's IP (e.g., 10.0.2.15 or 192.168.x.x)
Port	22
Connection type	SSH

Click **Open**.

If this is the first connection, accept the host key.

Then log in with your Ubuntu username and password.

You are now remotely controlling your Ubuntu server from Windows.

* Strictly confined Kubernetes makes edge and IoT secure. Learn how MicroK8s just raised the bar for easy, resilient and secure K8s cluster deployment.

<https://ubuntu.com/engage/secure-kubernetes-at-the-edge>

Expanded Security Maintenance for Applications is not enabled.

3 updates can be applied immediately.

To see these additional updates run: `apt list --upgradable`

Enable ESM Apps to receive additional future security updates.

See <https://ubuntu.com/esm> or run: `sudo pro status`

New release '24.04.4 LTS' available.

Run 'do-release-upgrade' to upgrade to it.
